

*The largest expert network
for clinical trials in Europe*

Who are we?

- COMBACTE is a non-profit organization
- COMBACTE maintains a high-quality clinical and laboratory research network for new options to treat or prevent bacterial infections in all European Union member states and affiliated countries
- The COMBACTE network consists of over 1000 medical centers and over 600 certified clinical laboratories across 42 countries in Europe
- COMBACTE is the largest infectious diseases expert network for clinical trials in Europe
- COMBACTE is Europe's largest clinical and laboratory research network

What do we offer to Chinese pharmaceutical companies interested to perform clinical trials in Europe?

- The COMBACTE network of key opinion leaders offers scientific services in infectious diseases with specific focus on the design of therapeutic and preventive (vaccines) in Europe
- COMBACTE offers operational services, in particular site management services towards those COMBACTE medical centers participating in clinical studies
- COMBACTE has been and still is involved in the many COVID-19 vaccine trials, both company-sponsored studies and investigator-initiated studies, and in many COVID-19 therapy trials, both in severely ill patients (hospitals) and in mild-moderately ill patients (community)
- COMBACTE offers its scientific and clinical expertise in a wide variety of infectious diseases and vaccine trials, ranging from Phase 0 (feasibility and epidemiology studies) up to Phase 4 (post launch studies) clinical studies

*Europe's largest
clinical and
